Contents

Preface	xiii
Chapter 1. Introduction to Vasopressin.....	1
<i>(John Laycock)</i>	
1. Brief Historical Perspective	1
2. General Development, Anatomy and Structure of the Neurohypophyseal System	2
3. Synthesis, Storage and Release of Neurohypophyseal Hormones	5
4. Vasopressin Assays	7
5. Physiological Actions	9
6. Receptors and Mechanisms of Action	11
7. Circulation and Metabolism	11
8. Control of Release of Vasopressin	13
9. Clinical Aspects of Vasopressin	14
10. Conclusion	14
Bibliography	16
Chapter 2. Comparative and Evolutionary Aspects of Vasopressin ..	21
<i>(Jacques Hanoune)</i>	
1. Introduction	21
2. Evolutionary Aspects of the Vasopressin Family	22
3. Evolutionary Aspects of the Vasopressin Receptor Family	27
4. Evolutionary Aspects of the Aquaporin Family	31
5. Conclusion	34
Bibliography	35

Chapter 3. The Neurohypophyseal System: Synthesis and Metabolism of Vasopressin	39
<i>(Jacques Hanoune)</i>	
1. Developmental Aspects of the Endocrine Hypothalamus	39
2. Biosynthesis	41
a) <i>Gene structure</i>	41
b) <i>Processing of the mature peptide</i>	46
3. Control of Vasopressin Secretion	49
a) <i>Control by extracellular osmolality and volaemia</i>	49
b) <i>Additional factors</i>	50
4. Extra-hypothalamic Expression of Vasopressin	53
a) <i>Adrenal medulla</i>	54
b) <i>Testis</i>	54
c) <i>Blood vessels and heart</i>	55
d) <i>Other organs</i>	55
5. Peripheral Degradation and Metabolic Clearance	55
Bibliography	58
 Chapter 4. Vasopressin Receptors, the Signalling Cascade and Mechanisms of Action	 67
<i>(Jacques Hanoune)</i>	
1. Introduction: A Short Historical Survey of Vasopressin Receptors	67
2. Pharmacological Characterization of the Vasopressin Receptors	69
3. Biochemical Characterization of the Vasopressin Receptors	71
4. Tissue Expression	73
a) <i>V1a receptor</i>	73
b) <i>V1b (V3) receptor</i>	74
c) <i>V2 receptor</i>	75
5. Vasopressin Receptors and G Proteins: An Overview	76
6. Structure of the Vasopressin Receptors	78
a) <i>General features</i>	78
b) <i>Modelling of vasopressin receptors</i>	79

7. Structural Basis of the Receptor-Ligand Interaction	79
a) <i>Binding of agonists</i>	79
b) <i>Binding of antagonists</i>	81
8. Domains Responsible for G Protein-Coupling	
Selectivity	82
9. Dimerization of Receptors	83
10. Signalling Pathways	84
a) <i>The heterotrimeric G protein</i>	84
b) <i>The cyclic AMP pathway</i>	87
c) <i>The calcium/phosphatidyl inositol pathway</i>	90
d) <i>The V2 receptor pathway</i>	92
e) <i>The V1a receptor pathway</i>	95
f) <i>The V1b receptor pathway</i>	96
g) <i>The proteomic approach</i>	97
11. Pre- and Post-transcriptional Regulation of Vasopressin	
Receptor Expression	97
12. Downregulation of Vasopressin Receptors:	
Desensitization and Internalization	99
13. Are There Other Vasopressin Receptors?	102
Bibliography	104

Chapter 5. Pharmacology of the Vasopressin Receptors 120

(*Jacques Hanoune*)

1. Introduction	120
2. Radio-labelled Ligands	120
3. Pharmacology of the Vasopressin V1a Receptor	122
4. Pharmacology of the Vasopressin V1b Receptor	123
5. Pharmacology of the Vasopressin V2 Receptor	125
6. Mixed Vasopressin V1a/V2 Receptor Antagonists	126
7. Inter-species and Inter-organ Variability	126
8. Conclusion	127
Bibliography	128

Chapter 6. Vasopressin and Its Renal Effects 133

(*John Laycock*)

1. Introduction	133
2. The Kidneys	134

3. The Renal Actions of Vasopressin	140
a) <i>Glomerular filtration and renal blood flow</i>	140
b) <i>Vasopressin and the proximal tubule</i>	142
c) <i>Vasopressin and the loop of Henle</i>	143
d) <i>Vasopressin and the distal convoluted tubule</i>	146
e) <i>Vasopressin and the collecting duct</i>	147
4. Conclusion	166
Bibliography	167

Chapter 7. Vasopressin and the Cardiovascular System 176

(John Laycock)

1. Introduction	176
2. Vasopressin and Its Vasoconstrictor Effect	177
3. Compensatory Mechanisms	180
a) <i>The central nervous system</i>	180
b) <i>Cellular mechanisms</i>	181
4. V2 Receptor-Mediated Vasodilatory Effect	181
5. Direct Cardiac Effects	182
a) <i>Coronary vasoconstriction</i>	182
b) <i>Cardiomyocyte contraction</i>	183
c) <i>Cardiomyocyte growth and proliferation</i> <i>(mitogenesis and hypertrophy)</i>	183
6. Central Cardiovascular Effects	184
7. Cardiovascular Interactions with Other Hormones	187
8. Vasopressin, the Kidneys and Arterial Blood Pressure ..	187
9. Vasopressin and Cardiovascular Development	189
10. Vasopressin and Haemostasis	190
11. Vassopressin and Hypertension	192
12. Conclusion	194
Bibliography	195

Chapter 8. Vasopressin and Its Interactions with Other Hormones and Control Systems 202

(John Laycock)

1. Introduction	202
2. Vasopressin Interactions	203
a) <i>The renin-angiotensin system</i>	203
b) <i>Prostaglandins</i>	207

c) <i>Nitric oxide</i>	208
d) <i>Oxytocin</i>	209
e) <i>Natriuretic peptides</i>	211
f) <i>Adrenomedullin</i>	212
g) <i>Catecholamines and the sympathetic nervous system</i>	213
h) <i>Gonadal steroids</i>	215
i) <i>The hypothalamo-pituitary-adrenal axis</i>	218
j) <i>The hypothalamo-pituitary-thyroid axis</i>	219
k) <i>Other anterior pituitary hormones</i>	219
3. Conclusion	221
Bibliography	222

Chapter 9. Understanding the Role of Vasopressin in the Hypothalamo-Pituitary Adrenocortical Axis 230
(Julia Buckingham)

1. Introduction	230
2. Historical Perspectives	231
3. Localisation and Regulation of Vasopressin in the Hypothalamo-Pituitary-Adrenal Axis	235
4. Mechanism of Vasopressin Action in the Pituitary Gland	243
5. Clinical Implications	245
6. Conclusion	248
Bibliography	249

Chapter 10. Vasopressin: The Central Systems 257
(Gareth Leng and Simone Meddle)

1. Introduction	257
2. Peptide Signalling in the Brain	257
3. Evolution of Vasopressin Systems	258
4. Behavioural Effects in Mammals	259
5. Chemical Coding in Neural Networks: Early Evidence of Complexity	261
6. Behavioural Effects of Vasopressin: History of the Idea	264
7. Vasopressin's Diverse Central Actions	265

8. Sources of Vasopressin in the Brain	266
9. Sex Differences in the Vasopressin System	268
10. Central Actions of Vasopressin	269
a) <i>Vasopressin cardiovascular regulation</i>	269
b) <i>Vasopressin in thermoregulation</i>	269
c) <i>Vasopressin stress responses, anxiety and depression</i>	270
d) <i>Vasopressin in social behaviours</i>	271
e) <i>Vasopressin in learning and memory</i>	274
11. Parvocellular Vasopressin Cells of the Paraventricular Nucleus	276
12. The Suprachiasmatic Nucleus	277
13. The Magnocellular Vasopressin System	278
14. Dendritic Localization of Peptides	280
15. Vasopressin as an Autoregulator of Vasopressin Cell Activity	281
16. Conclusion	282
Bibliography	283

Chapter 11. Vasopressin Secretion: Mechanisms of Control of

Secretion from the Posterior Pituitary Gland 288

(Gareth Leng)

1. Introduction	288
2. Synthesis and Storage of Vasopressin	289
3. The Magnocellular Vasopressin Neurons	291
4. Regulation of Vasopressin Secretion	295
5. Stimulus-Secretion Coupling in the Neural Lobe	298
6. Vasopressin as an Autoregulator of Vasopressin Cell Activity	301
7. Phasic Firing	302
8. Physiological Significance of Phasic Firing	306
9. Diabetes Insipidus: The Consequences of Failure of Vasopressin Release	309
Bibliography	312

Chapter 12. Clinical Aspects of Vasopressin 315

(Jacques Hanoune and John Laycock)

1. Introduction	315
-----------------------	-----

2. Renal Disorders	316
a) <i>Central (hypothalamic) diabetes insipidus</i>	316
b) <i>Nephrogenic diabetes insipidus</i>	317
c) <i>Syndrome of inappropriate vasopressin secretion</i>	319
3. Hyponatraemic Disorders	321
a) <i>Congestive heart failure and other oedematous, hyponatraemic states</i>	321
4. Essential Hypertension	325
5. Haemolytic Disorders	327
a) <i>von Willebrand's disease</i>	328
b) <i>Mild haemophilia A</i>	329
c) <i>Other bleeding disorders</i>	329
6. Conclusion	329
Bibliography	330
Index	337

Preface

Having spent much of my life studying the neurohypophysial hormone vasopressin, it is a great pleasure to have been involved in the production of a book giving various current perspectives on this hormone. It has been my good fortune to be able to invite a few long-standing friends and colleagues to contribute their knowledge and understanding of the hormone in particular areas of their expertise. I am very grateful to them all, particularly since they are all very busy people. There is some overlap between chapters on occasion but I think that this is generally appropriate since it allows each chapter to inform the reader independently without too much need for cross-reference between them. On the other hand, other relevant chapters are indicated when helpful to the reader. The end result is a text which covers most aspects of vasopressin research in a readily digestible format which I hope the reader will enjoy.

John F. Laycock
