ACKNOWLEDGEMENTS

This book is based on research undertaken under the rubric of the Sixth Framework Programme project *Understanding the Relationship between Knowledge and Competitiveness in the Enlarging European Union ('U-Know')*, Contract no: cit-02 85 19. The editor and authors are grateful to the European Union and the European Commission for the financial, intellectual and moral support they have given us.

David A. Dyker

CONTENTS

<i>Acknowledgements</i>	v
<i>List of Tables</i>	xi
<i>List of Figures</i>	xv
<i>List of Contributors</i>	xix
Introduction	1
Chapter 1 Alignment, Misalignment and Dynamic Network-Based Capabilities <i>Nick von Tunzelmann</i>	3
Section 1 Innovation Networks	23
Chapter 2 The UK Innovation System, from a Misalignment Perspective <i>Nick von Tunzelmann</i>	25
Chapter 3 Still Divided by Transformation? Characteristic Features of the German Innovation System and the Barriers to Extending It to East Germany <i>Peter Franz</i>	45
Chapter 4 The Governance and Management of Technical Change in Transition Countries <i>David A. Dyker</i>	63
Chapter 5 Mutual Perception of Science and Industry in Innovation Networks — Evidence from East Germany <i>Jutta Günther and Cornelia Lang</i>	87

Chapter 6	The Slovakian Innovation System — Why Does It Not Work? <i>Silvester Salis</i>	109
Section 2	Labour Markets, Job Matching and Social Networking	131
Chapter 7	Job Matching, Human Capital Accumulation and Economic Development <i>David A. Dyker</i>	133
Chapter 8	Human Capital and Skills in Hungary — Matching Demand and Supply <i>Andrea Szalavetz</i>	143
Chapter 9	Labour Market Constraints in Romania: The Challenge of Skill Mismatch in a Transforming Economy <i>Dragos Pislaru</i>	159
Chapter 10	Horizontal and Vertical Mismatch in the Labour Market among Graduate Students with Generic or Vocational Higher Education <i>Pål Børing</i>	185
Chapter 11	Human Resources and Skills Gap in a Regional Context: The Case of Campania <i>Maria Del Sorbo</i>	207
Chapter 12	Urbanisation and Network Alignment Issues in Istanbul: Informal Networks in Housing and Labour Markets <i>Ozge Aktas</i>	233
Section 3	Industrial Networks and International Spillovers	253
Chapter 13	Knowledge Spillovers, Innovation and Firm-Level Productivity Growth in Slovenia <i>Jože P. Damijan, Črt Kostevc, Matija Rojec and Andreja Jaklič</i>	255

Chapter 14	The Impact of Technology on Skills in Estonian Wood-Based Industries <i>Kadri Ukrainski</i>	277
Chapter 15	FDI and the National Innovation System — Evidence from Central and Eastern Europe <i>Jutta Günther, Björn Jindra and Johannes Stephan</i>	303
Chapter 16	The Impact of Outward FDI on Home-Country Employment in a Low-Cost Transition Economy <i>Jaan Masso, Urmas Varblane and Priit Vahter</i>	333
Chapter 17	Network Alignment in the Automotive Clusters of Turkey and Poland <i>Guldem Ozatagan</i>	361
	<i>Index</i>	385

LIST OF TABLES

Table 1.1	Modes of governance and their failures	9
Table 1.2	Examples of intrinsic (particular) as opposed to systemic failures of governance modes	10
Table 1.3	Channels of learning (after Malerba, 1992)	13
Table 3.1	German patent applications differentiated by 31 technological fields, 1995, 2000 and 2005	48
Table 3.2	Patent applications effective in Germany in selected fields of automotive technology, 2001–2007, from selected countries	49
Table 3.3	German patent applications and patent density by <i>Länder</i> and region, 1995, 2000 and 2005	53
Table 3.4	Selected indicators for the public-sector science and research system at the <i>Länder</i> and regional levels	55
Table 6.1	Innovation in Slovakia	114
Table 9.1	Youth unemployment rates in the EU	167
Table 9.2	Unemployment rate, ILO definition, by level of education, gender and rural/urban residence, 2006	168
Table 9.3	Romania and the Lisbon educational indicators	170
Table 10.1	Descriptive statistics for the new graduates who answered the questionnaire in the Graduate Surveys: The net sample	189
Table 10.2	Estimates of multinomial logistic regressions: The probability of being mismatched as opposed to being employed without being mismatched six months after graduation: The net sample	196
Table 11.1	Competences classification, examples	211
Table 12.1	Population of Istanbul, 1927–2000	234
Table 12.2	Housing information networks in Yesiltepe: How they heard about their current neighbourhood	240
Table 12.3	House ownership in Yesiltepe	241
Table 12.4	Employment status	247
Table 13.1	Determinants of firm-level innovation in Slovenia, 1996–2002	260
Table 13.2	The probability of a firm innovating in Slovenia, 1996–2002 (results of a probit model)	261

Table 13.3	Impact of R&D and innovation on TFP growth of Slovenian firms, 1996–2002	265
Table 13.4	Growth in VA/Emp (difference in logs) two periods after innovation $(t + 2) - t$	267
Table 13.5	Growth in VA/Emp (difference in logs) between two and four periods after innovation $(t + 4) - (t + 2)$	267
Table 13.6	Growth in VA/Emp (difference in logs) two periods after innovation $(t + 2) - t$ [Process innovation]	267
Table 13.7	Growth in VA/Emp (difference in logs) between two and four periods after innovation $(t + 4) - (t + 2)$ [Process innovation]	268
Table 13.8	Growth in VA/Emp (difference in logs) two periods after innovation $(t + 2) - t$ [Product innovation]	268
Table 13.9	Growth in VA/Emp (difference in logs) between two and four periods after innovation $(t + 4) - (t + 2)$ [Product innovation]	268
Table 13.A1	The probability of firms innovating products and processes in Slovenia, 1996–2002 (Results of a probit model)	275
Table 14.1	Examples of technological advance in the wood sector	279
Table 14.2	Increased skill requirements and underlying changes in wood technology	283
Table 14.3	Coverage of data sources by number of employees	287
Table 14.4	Differences in mean values of indicators across groups of firms by innovative activities	295
Table 14.5	Skill demand by types of skill in the Estonian wood sector	296
Table 15.1	Country composition of total population of manufacturing firms with foreign investors	311
Table 15.2	The IWH FDI micro database — country composition and response rates	311
Table 15.3	Average importance of strategic motives for investment, by host economy	313
Table 15.4	Correlation between interaction with scientific institutions and determinants of degree of embeddedness	327
Table 16.1	Number of firms by sector, and presence of inward and outward FDI, 1996–2002	335
Table 16.2	The role of the four groups of firms in the Estonian economy in 2002 (% of the sector totals)	344
Table 16.3	Annual average employment growth rate of firms with inward or outward FDI	345
Table 16.4	Change in employment after implementing outward FDI, 1995–2002	347

Table 16.5	Employment growth model parameter estimates: robust regressions	349
Table 16.6	Probit model for making new outward FDI	351
Table 16.7	Effect of OFDI on employment growth at home (ATT): propensity score matching results for the service sector	353
Table 16.8	Effect of outward FDI on employment growth at home (ATT): propensity score matching results for the manufacturing sector	353
Table 16.9	Year-by-year matching for the service sector: the first year of OFDI	354
Table 16.10	Matching results for indirect and direct investors: the service sector, 2000–2002	354
Table 16.A1	Summary statistics of regressors used in the employment growth model and probit model for new outward investments	359
Table 16.A2	Testing for balancing property by testing for differences in means: the service sector, 2000–2002	360
Table 17.1	Survey results by country	369
Table 17.2	Network alignment in Bursa and Upper Silesia	370
Table 17.3	Type of network and innovation: test of homogeneity of variances	372
Table 17.4	Type of network and innovation: robust tests of equality of means	372
Table 17.5	Results of ANOVA: variation in innovation within and between the different types of networks	373
Table 17.6	Post-hoc (LSD) test for differences in innovativeness by type of network	375
Table 17.7	Type of network and innovative behaviour: a synthesis	376

LIST OF CONTRIBUTORS

Ozge Aktas

D.Phil. Student
School of Social and Cultural Studies
University of Sussex, UK

Pål Børing

Research Fellow, NIFU STEP, Norway

Jože Damjan

Associate Professor
Faculty of Economics
University of Ljubljana, Slovenia

David A. Dyker

Honorary Professorial Fellow
SPRU — Science and Technology Policy Research
University of Sussex, UK

Peter Franz

Department of Urban Economics
IWH Halle, Germany

Jutta Günther

Head of Department of Structural Economics
IWH Halle, Germany

Andreja Jaklič

Assistant Professor
Faculty of Social Sciences
University of Ljubljana, Slovenia

Björn Jindra

Department of Structural Economics
IWH Halle, Germany

Črt Kostevc

Assistant Professor
Faculty of Economics
University of Ljubljana, Slovenia

Cornelia Lang

Department of Macroeconomics
IWH Halle, Germany

Jaan Masso

Senior Research Fellow
Faculty of Economics and Business Administration
University of Tartu, Estonia

Guldem Ozatagan

D.Phil. Student
School of Social and Cultural Studies
University of Sussex, UK

Dragos Pislaru

General Manager
GEA Strategy & Consultancy
Bucharest, Romania

Matija Rojec

Associate Professor
Faculty of Social Sciences
University of Ljubljana, Slovenia

Andrea Salavetz

Senior Research Fellow
Institute for World Economics of the Hungarian Academy of Sciences, Hungary

Silvester Salis

Research Fellow
Institute of Forecasting
Slovak Academy of Sciences, Slovakia

Maria Del Sorbo

Visiting D.Phil. Researcher
SPRU — Science and Technology Policy Research
University of Sussex, UK
PhD Researcher, University of Salerno, Italy

Johannes Stephan

Lecturer and Research Fellow
Technical University of Freiberg, Germany

Nick von Tunzelmann

Professor of the Economics of Science and Technology
SPRU — Science and Technology Policy Research
University of Sussex, UK

Kadri Ukrainski

Research Fellow
Faculty of Economics and Business Administration
University of Tartu, Estonia

Priit Vahter

Ph.D. Student
Faculty of Economics and Business Administration
University of Tartu
School of Economics, University of Birmingham, UK

Urmas Varblane

Professor of International Business
Faculty of Economics and Business Administration
University of Tartu, Estonia
