1. Introduction	1
2. The Origins of Operational Research: Military and Other Antecedents to 1937	30
3. The Beginnings of Operational Research: British Air Strategy, 1920–1940	58
4. The Wartime Diffusion of Operational Research, 1940–1945	86
5. Operational Research in Bomber Command, 1941–1945	132
6. The Postwar Labour Government and Operational Research, 1945–1951	185
7. Operational Research in Iron and Steel	209
8. Operational Research in Coalmining	253
9. The Diffusion of Operational Research After 1960: The Corporate Sector	293
10. Operational Research in the Public Sector	334
11. The Institutional Development of Operational Research	365
Bibliography	413
Index	437

Patrick Maynard Stuart Blackett (Baron Blackett of Chelsea),
the 'Father' of Operational Research in 1964

List of Figures

- 1.1 Science Schema
- 2.1 Appleyard's Diagrams
- 2.2 Flash Spotting
- 2.3 Layout of a Sound-Ranging Section
- 3.1 Tizard ('Tizzy') Angle
- 4.1 The Structure of Coastal Command Headquarters
- 4.2 Frequency Plotted Against Time Interval: Data up to May 1941
- 4.3 The First Sixteen Attacks to be Analysed
- 4.4 Mean Centre Points for Attacks
- 4.5 Shipping Losses as a Result of U-boat Action, 1941-3
- 5.1 Accuracy of Night Bombing of German Cities
- 5.2 Monthly Totals of Tons Dropped Per Sorties Despatched by Bomber Command
- 7.1 The Growth of BISRA
- 7.2 The Organisation of BISRA
- 7.3 Total Importing Cost
- 7.4 Repair Queueing Model
- 7.5 Typical Availability Chart (12-furnace shop)
- 8.1 Growth of Operational Research Staff in FIG, 1947-65
- 8.2 Organisation of the Operational Research Branch
- 8.3 Results of Monte Carlo Computations of Warning Time
- 10.1 O.R. Groups in Civil Departments of British Civil Service

List of Tables

- 3.1 Summary of Pre-War Expansion Schemes -- 1934-1939
- 4.1 U-boat Effectiveness During the Second World War
- 4.2 Progress of Lethality of Attacks
- 5.1 Percentage of Attacking Sorties Within Three Miles of Aiming Point
- 5.2 Density at the Aiming Point -- German Cities
- 5.3 Bomber Command Targets in the European Theatre,
October-December 1944
- 5.4 Bomber Command Targets in the European Theatre,
January-April 1945
- 5.5 German War Production, 1942-1944
- 5.6 Actual and Potential Armaments Production, 1943-4
- 7.1 Absence Episodes per 1000 Working Shifts
- 8.1 Information Used in Selection Procedure
- 11.1 Attendance at the First IFORS Conference
- 11.2 The National Societies in IFORS, with their Year of Joining
- 11.3 Area of Employment in Operational Research
- 11.4 Respondents' First Degree Subject

Acknowledgements

I have incurred many debts in writing this book, the first of two projected volumes on the history of operational research in Britain. I am grateful to Robert Fildes for stimulating my early interest in the subject and to Rebecca Capey for research assistance. I owe a particular debt of gratitude to the Operational Research Society for funding the costs of the project. I must also acknowledge the invaluable support that I have received from members of the Society's Archives Committee — John Friend, J. D. Griffiths, Brian Haley, Norman Lawrie, Bob Miles, George Mitchell, Maurice Shutler, Richard Storey, Rolfe Tomlinson and Christine Woodland. All of them have given liberally of their advice and without their assistance this first stage of the project could not have been brought to fruition. Special thanks are due to Norman Lawrie in his capacity as a stern but sympathetic critic: his unerring eye for inconsistencies and infelicities in exposition has resulted in a much improved manuscript.

Beyond the Archives Committee, I wish to acknowledge the help received from the following individuals: Jim Bamberg, Ray Beatty, Stafford Beer, Ken Bowen, Christopher Chapman, Peter Checkland, Roger Collcutt, David Comins, Sebastian Cox, Nigel Cummings, Peter Davies, Ian Disley, R. T. Eddison, Samuel Eilon, Caroline Elliott, Ernest Field, Alec Glaskin, Carl Harris, J. Harrington, E. K. James, H. G. Jones, Ernest Koenigsberg, John Lawrence, Fred Lloyd, Robert Locke, John Macfarlane, Mike Makower, Alan Mercer, Hugh Miser, Jim Morrison, John Mowat, David Owen, Janet Parker, Peter Pengilly, R. W. Pipe, Graham Rand, John Ranyard, Pat Rivett, Shirley Rodden, Jonathan Rosenhead, Ronnie Shephard, Brian Shorrocks, David Steer, John Stringer, Ian Taylor, Derek Trigg, Stephen Watson, Doug White and Brian Whitworth. Needless to say, they bear no responsibility for the opinions expressed or for any errors of fact or interpretation.

Maurice W. Kirby

Patrick Blackett, the young physicist

Sir Henry Tizard, Chairman of the CSSAD

Sir Robert Watson-Watt, Superintendent of the Radio Department,
National Physical Laboratory

F. A. Lindemann, Lord Cherwell, one time member of the CSSAD and
Paymaster-General in the wartime Coalition Government

Sir Arthur T. Harris, Bomber Command's outstanding Commander-in-Chief, 1942-5

Dr. B. G. Dickens, Officer-in-Charge, Bomber Command's
Operational Research Section

Professor Solly (later Lord) Zuckerman in 1945

Sir Charles Goodeve, Director of BISRA

Stafford Beer, pioneer of Operational Research and Cybernetics
in the iron and steel industry

Roger Eddison, Founding Editor of the *Operational Research Quarterly*

Professor B. H. P. ('Pat') Rivett, pioneer of Operational Research in the
coalmining industry and first Professor of Operational Research
in a British university

Professor P. M. Morse, Operational Research practitioner and
the outstanding advocate of Operational Research in American universities

Sir Owen Wansbrough-Jones,
President of the Operational Research Society, 1954-5

Sir William Slater, President of
the Operational Research Society, 1956-7

The Rt. Hon. the Earl of Halsbury,
President of the Operational Research Society, 1960-1
