THE CHAOS AVANT-GARDE

MEMORIES OF THE EARLY DAYS OF CHAOS THEORY

WORLD SCIENTIFIC SERIES ON NONLINEAR SCIENCE

Editor: Leon O. Chua
University of California, Berkeley

Series A. MONOGRAPHS AND TREATISES

- Volume 23: Nonlinear Dynamics in Particle Accelerators
R. Dilão & R. Alves-Pires
- Volume 24: From Chaos to Order
G. Chen & X. Dong
- Volume 25: Chaotic Dynamics in Hamiltonian Systems
H. Dankowicz
- Volume 26: Visions of Nonlinear Science in the 21st Century
J. L. Huertas, W.-K. Chen & R. N. Madan
- Volume 27: The Thermomechanics of Nonlinear Irreversible Behaviors — An Introduction
G. A. Maugin
- Volume 28: Applied Nonlinear Dynamics & Chaos of Mechanical Systems with Discontinuities
Edited by M. Wiercigroch & B. de Kraker
- Volume 29: Nonlinear & Parametric Phenomena*
V. Damgov
- Volume 30: Quasi-Conservative Systems: Cycles, Resonances and Chaos
A. D. Morozov
- Volume 31: CNN: A Paradigm for Complexity
L. O. Chua
- Volume 32: From Order to Chaos II
L. P. Kadanoff
- Volume 33: Lectures in Synergetics
V. I. Sugakov
- Volume 34: Introduction to Nonlinear Dynamics*
L. Kocarev & M. P. Kennedy
- Volume 35: Introduction to Control of Oscillations and Chaos
A. L. Fradkov & A. Yu. Pogromsky
- Volume 36: Chaotic Mechanics in Systems with Impacts & Friction
B. Blazejczyk-Okolewska, K. Czołczynski, T. Kapitaniak & J. Wojewoda
- Volume 37: Invariant Sets for Windows — Resonance Structures, Attractors, Fractals and Patterns
A. D. Morozov, T. N. Dragunov, S. A. Boykova & O. V. Malysheva
- Volume 38: Nonlinear Noninteger Order Circuits & Systems — An Introduction
P. Arena, R. Caponetto, L. Fortuna & D. Porto

Preface

In 1998 we decided to put together this volume of memoirs of chaos pioneers, before they disappear. After some thought, we decided to invite only the avant-garde, the people who had struggled with chaos concepts before the acceptance of the new paradigm. We limited the time span of this period to 1959-1974. The terminus was the attachment of the word *chaos* to dynamical systems theory, early in 1974, by Li and Yorke, which coincided with the beginning of Rössler's writings on the significance of the word *chaos* in this context.

We wrote to these individuals in the Spring of 1999, almost all responded with a memoir or two, which are published here, many for the first time. One exception is Ed Lorenz, who did not respond to our letter. We have included a short piece by him, taken from his own book, *The Essence of Chaos*. Another is David Ruelle, who replied, "I now leave it to other people to think and write about the early days of chaos theory." Finally, Robert May declined, due to pressures on his time.

The order of the pieces in this collection is our rough approximation to the actual sequence of events. Various permutations might have been chosen equally.

We apologize to the many pioneers not represented here. We hope that this volume is just the first of a sequence. Finally, we are grateful to Professors Akamatsu and Inagaki, former students of Professor Ueda, for suggesting this project.

Contents

Preface	v
1. On How I Got Started in Dynamical Systems 1959–1962	1
<i>Steve Smale</i>	
2. Finding a Horseshoe on the Beaches of Rio	7
<i>Steve Smale</i>	
3. Strange Attractors and the Origin of Chaos	23
<i>Yoshisuke Ueda</i>	
4. My Encounter with Chaos	57
<i>Yoshisuke Ueda</i>	
5. Reflections on the Origin of the Broken-Egg Chaotic Attractor	65
<i>Yoshisuke Ueda</i>	
6. The Chaos Revolution: A Personal View	81
<i>Ralph Abraham</i>	
7. The Butterfly Effect	91
<i>Edward Lorenz</i>	
8. I. Gumowski and a Toulouse Research Group in the “Prehistoric” Times of Chaotic Dynamics	95
<i>Christian Mira</i>	
9. The Turbulence Paper of D. Ruelle and F. Takens	199
<i>Floris Takens</i>	

10. Exploring Chaos on an Interval 201
T. Y. Li and James A. Yorke

11. Chaos, Hyperchaos and the Double-Perspective 209
Otto E. Rössler
