SOLITON EQUATIONS AND HAMILTONIAN SYSTEMS

ADVANCED SERIES IN MATHEMATICAL PHYSICS

Editors-in-Charge

V G Kac (*Massachusetts Institute of Technology*)
D H Phong (*Columbia University*)
S-T Yau (*Harvard University*)

Associate Editors

L Alvarez-Gaumé (*CERN*)
J P Bourguignon (*Ecole Polytechnique, Palaiseau*)
T Eguchi (*University of Tokyo*)
B Julia (*CNRS, Paris*)
F Wilczek (*Institute for Advanced Study, Princeton*)

Published

- Vol. 1: Mathematical Aspects of String Theory
edited by S-T Yau
- Vol. 2: Bombay Lectures on Highest Weight Representations
of Infinite Dimensional Lie Algebras
by V G Kac and A K Raina
- Vol. 3: Kac-Moody and Virasoro Algebras: A Reprint Volume for Physicists
edited by P Goddard and D Olive
- Vol. 4: Harmonic Mappings, Twistors and σ -Models
edited by P Gauduchon
- Vol. 5: Geometric Phases in Physics
edited by A Shapere and F Wilczek
- Vol. 7: Infinite Dimensional Lie Algebras and Groups
edited by V Kac
- Vol. 8: Introduction to String Field Theory
by W Siegel
- Vol. 9: Braid Group, Knot Theory and Statistical Mechanics
edited by C N Yang and M L Ge
- Vol. 10: Yang-Baxter Equations in Integrable Systems
edited by M Jimbo
- Vol. 11: New Developments in the Theory of Knots
edited by T Kohno

CONTENTS

0. Introduction	1
Chapter 1. Integrable Systems Generated by Linear Differential nth Order Operators	7
1.1. Differential algebra $\mathcal{A}$	7
1.2. Space of functionals $\tilde{\mathcal{A}}$	8
1.3. Ring R of pseudodifferential operators	9
1.4. Lax pairs. KdV-type hierarchies of equations	12
1.5. First integrals (constants of motion)	14
1.6. Soliton solutions	15
1.7. Resolvent. Adler mapping H	17
Chapter 2. Hamiltonian Structures	21
2.1. Finite-dimensional case	21
2.2. Hamilton mapping	26
2.3. Variational principles	27
2.4. Symplectic form on an orbit of the coadjoint representation of a Lie group	31
2.5. Purely algebraic treatment of the Hamiltonian structure	34

Chapter 3. Hamiltonian Structure of the KdV-Hierarchies	40
3.1. Lie algebra $\mathfrak{E}$ and complex Ω	40
3.2. Proof of the Hamiltonian property of the Adler mapping	42
3.3. Poisson bracket	46
3.4. Reduction to the submanifold $u_{n-1} = 0$	48
3.5. Variation of the resolvent	50
3.6. Hamiltonians of the KdV-hierarchies	51
3.7. Virasoro algebra	52
 Chapter 4. The Kupershmidt-Wilson Theorem	 55
4.1. A generalization of the Gardner-Zakharov-Faddeev bracket	55
4.2. Miura transformation. Kupershmidt-Wilson theorem	57
4.3. Modified KdV equation. Lie-Bäcklund transformations	59
 Chapter 5. The KP-Hierarchy	 62
5.1. Introductory notes	62
5.2. Definition of the KP-hierarchy	63
5.3. Reduction of the KP-hierarchy to the KdV	65
5.4. First integrals	66
5.5. Soliton solutions	67
 Chapter 6. Hamiltonian Structure of the KP-Hierarchy	 70
6.1. Hamiltonian structure	70
6.2. Resolvent	73
6.3. Hamiltonians of the KP-hierarchies	76
 Chapter 7. Baker Function, τ-Function	 79
7.1. Dressing	79
7.2. Baker function	81
7.3. Bilinear identity	82
7.4. Riccati equation	85
7.5. List of useful formulas for the Faà di Bruno polynomials	91
7.6. Resolvent and Baker function	92
7.7. τ -function	94
7.8. Additional symmetries	100
7.9. τ -function and Fock representation	104

Chapter 8. Grassmannian. τ-Function and Baker Function after Segal and Wilson. Algebraic-Geometrical Krichever's Solutions	109
8.1. Grassmannian after Segal and Wilson	109
8.2. Algebraic-geometrical solutions of Krichever	115
8.A. Appendix: Abel mapping and the θ -function	119
Chapter 9. Matrix First-Order Operators	123
9.1. Hierarchy of equations generated by a first-order matrix differential operator	123
9.2. Hamiltonian structure	130
9.3. Hamiltonians of the matrix hierarchy	133
9.4. Segal-Wilson style theory, soliton solutions	137
9.A. Appendix: Extension of the algebra $\mathcal{A}$ to an algebra closed with respect to indefinite integration	138
Chapter 10. KdV-Hierarchies as Reductions of Matrix Hierarchies	140
10.1. Reduction of matrix manifolds	140
10.2. Hamiltonian structures. Resolvent	144
10.3. Reduction to a factor-manifold	148
10.4. Kupershmidt-Wilson theorem	151
10.5. The general Drinfeld-Sokolov scheme	154
Chapter 11. Stationary Equations	156
11.1. The ring of functions on the equation phase space	156
11.2. Characteristics of first integrals	159
11.3. Hamilton structure	160
Chapter 12. Stationary Equations of the KdV-Hierarchy in the Narrow Sense ($n = 2$)	165
12.1. Theory of the KdV-hierarchy ($n = 2$) independent of Chap. 1	165
12.2. Stationary equations	170
12.3. Integration after Liouville	176
12.4. Return to original variables	181

Chapter 13. Stationary Equations of the Matrix Hierarchy	186
13.1. Hamilton structure. First integrals	186
13.2. Hamilton structure of stationary equations	193
13.3. Action-angle variables	198
 Chapter 14. Stationary Equations of the Matrix Hierarchy (Continuation)	 202
14.1. Baker function. Return to original variables	202
14.2. Rotation of an n -dimensional rigid body	208
 Chapter 15. Stationary Equations of the KdV-Hierarchies	 213
15.1. Reduction to stationary equations of the matrix hierarchy	213
15.2. First integrals	220
15.3. Hamilton structure. Integration	226
 Chapter 16. Matrix Differential Operators Polynomially Depending on a Parameter	 229
16.1. Resolvent	229
16.2. Another hierarchy of equations	232
16.3. Two Hamiltonian structures	233
16.4. Piosson-Lie-Berezin-Kirillov-Costant bracket, central extension, and Kac-Moody algebras	237
16.5. Hamiltonians in involution	238
16.6. Still more general equation	240
16.7. Principal chiral field equation	241
 Chapter 17. Multi-time Lagrangian and Hamiltonian Formalism	 245
17.1. Introduction	245
17.2. Variational bi-complex	247
17.3. Exactness of the bi-complex	251
17.4. Variational derivative	256
17.5. Lagrangian-Hamiltonian formalism	260
17.6. Variational bi-complex of a differential equation. First integrals	264
17.7. Poisson bracket	268

17.8. Connection with the single-time formalism	269
Chapter 18. Further Examples and Applications	274
18.1. KP-hierarchy	274
18.2. Polynomial matrix family	279
18.3. Principal chiral field	288
18.4. Integrable systems related to n th-order differential operators	297
References	303
