ADVANCES IN CHEMISTRY

A Selection of C. N. R. Rao's Publications (1994 – 2003)

WORLD SCIENTIFIC SERIES IN 20TH CENTURY CHEMISTRY

Consulting Editors: D. H. R. Barton (Texas A&M University)
F. A. Cotton (Texas A&M University)
Y. T. Lee (Academia Sinica, Taiwan)
A. H. Zewail (California Institute of Technology)

Published:

- Vol. 1: Molecular Structure and Statistical Thermodynamics
— Selected Papers of Kenneth S. Pitzer
by Kenneth S. Pitzer
- Vol. 2: Modern Alchemy
— Selected Papers of Glenn T. Seaborg
by Glenn T. Seaborg
- Vol. 3: Femtochemistry: Ultrafast Dynamics of the Chemical Bond
by Ahmed H. Zewail
- Vol. 4: Solid State Chemistry
— Selected Papers of C. N. R. Rao
edited by S. K. Joshi and R. A. Mashelkar
- Vol. 5: NMR in Structural Biology
— A Collection of Papers by Kurt Wüthrich
by Kurt Wüthrich
- Vol. 6: Reason and Imagination: Reflections on Research in Organic Chemistry
— Selected Papers of Derek H. R. Barton
by Derek H. R. Barton
- Vol. 7: Frontier Orbitals and Reaction Paths
— Selected Papers of Kenichi Fukui
edited by K. Fukui and H. Fujimoto
- Vol. 8: Quantum Chemistry
— Classic Scientific Papers
translated and edited by Hinne Hettema
- Vol. 9: The Oxidation of Oxygen and Related Chemistry
— Selected Papers of Neil Bartlett
edited with introductory essays by Neil Bartlett
- Vol. 10: Linus Pauling
— Selected Scientific Papers
edited by Barclay Kamb, Linda Pauling Kamb, Peter Jeffress Pauling, Alexander Kamb and Linus Pauling, Jr.
- Vol. 11: Across Conventional Lines — Selected Papers of George A. Olah
edited by George A. Olah and G. K. Surya Prakash

FOREWORD

Professor Chintamani Nagesa Ramachandra Rao (C.N.R. Rao) is a towering personality in Indian science in the post-Independence era, whose immense contributions span over five decades covering several facets of Chemical Sciences. Professor Rao's prolific research work delineated in more than 1200 publications and 36 books, has made an impact on a wide range of topics that include chemical spectroscopy, molecular structure, various aspects of the solid state — synthesis, structure and properties. To him, it concerns very little whether the system under investigation is organic, inorganic or a composite material, but it is the property or the phenomenon that interests him always. For example, he has worked with equal felicity on rutile-anatase, metal-insulator, plastic-crystalline, para-ferri-ferro magnetic transitions as well as on charge-ordering, phase separation, donor-acceptor complexes, superconductors, and last but not least, the fascinating field of fullerenes and nanomaterials.

Solid State and Materials Chemistry has been very close to his heart during the last two decades, where he has made significant contributions to the synthesis of novel materials, developing new routes to synthesis, copper oxide based superconductors, manganese oxide based magnetoresistive materials, among others. Particularly noteworthy is his unique work on porous and open-framework solids, where he has not only assembled a variety of crystalline architectures but also unravelled the fundamental principles governing the formation of structures of different dimensionalities. A natural extension has been into the fascinating world of the supramolecular chemistry, where for example, he has synthesized a novel organic zeolite and a hybrid solid containing layers of silver sheets separated by an organic spacer. He has established a world class research laboratory for the synthesis and investigation of nanomaterials in various forms of aggregation including clusters, tubes and wires; a special Y-junction nanotube showing rectification, doped gallium nitride nanowires and several nanoobjects based on transition metal chalcogenides are some of the important materials created in his laboratory.

It is with a profound sense of respect and gratitude to Professor C.N.R. Rao that we present to the scientific community, this monograph containing a selected collection of seventy of his research publications spanning the last one decade (1994–2003). It has not been an easy task to make this selection, especially because another set of equally important papers could have been easily collected from his 350 publications during

this period. In making this selection, an effort has been made to bring out the flavour of Professor Rao's contribution to the entire gamut of Chemistry and Physics of Materials, in general. The collection of papers under different sections is preceded by Professor Rao's comments which embellish the contents with a personal touch. It must be added that such an elegant publication would not have been possible without the support from the Third World Academy of Sciences, Trieste, and the cooperation of the Publisher, World Scientific Publishing Co., Singapore especially, Dr. K.K. Phua, and Ms. Lakshmi Narayanan.

We do believe that the present volume will not only be treasured by his friends, close associates and admirers but also be cherished by young practitioners. For the two of us, it has indeed been a great privilege and honour to serve as Editors of this special monograph felicitating Professor C.N.R. Rao on his 70th birthday.

*May God Almighty bless him with many more
years of research activity and highest scientific
laurels!*

G.U. Kulkarni

J. Gopalakrishnan

Contents

I. Highlights of Materials Chemistry	1
<i>C.N.R. Rao</i>	
1. Novel Materials, Materials Design and Synthetic Strategies: Recent Advances and New Directions, <i>J. Mater. Chem.</i> 9 , 1 (1999).	5
2. The Metal–Nonmetal Transition: A Global Perspective, (with P.P. Edwards and T.V. Ramakrishnan), <i>J. Phys. Chem.</i> 99 , 5228 (1995).	19
3. Virtues of Marginally Metallic Oxides, <i>Chem. Commun.</i> , 2217 (1996).	31
4. Phase Separation in Metal Oxides, (with P.V. Vanitha and A.K. Cheetham), <i>Chem. Eur. J.</i> 9 , 829 (2003).	37
5. Science and Technology of Nanomaterials: Current Status and Future Prospects, (with A.K. Cheetham), <i>J. Mater. Chem.</i> 11 , 2887 (2001).	45
II. Transition Metal Oxides (including Cuprate Superconductors)	53
<i>C.N.R. Rao</i>	
6. Chemical Strategies for the Synthesis of Metal Oxides, in <i>Reactivity of Solids: Past, Present and Future</i> , A 'Chemistry for the 21 st Century' monograph, IUPAC, Ed. V.V. Boldyrev, Blackwell Science Publishers, Oxford, p. 237, 1996.	55
7. Solid–Solid Interfaces in the Epitaxial Films of Complex Oxides Deposited by Chemical Methods, (with A.R. Raju and H.N. Aiyer), in <i>Interfacial Science</i> , A 'Chemistry for the 21 st Century' monograph, IUPAC, Ed. M.W. Roberts, Blackwell Science Publishers, p. 1, 1997.	70
8. Sub-micrometre Spherical Particles of TiO ₂ , ZrO ₂ and PZT by Nebulized Spray Pyrolysis of Metal–Organic precursors, (with P. Murugavel, M. Kalaiselvam and A.R. Raju), <i>J. Mater. Chem.</i> 7 , 1433 (1997).	89

9. A Study of Cubic Bismuth Oxides of the Type $\text{Bi}_{26-x}\text{M}_x\text{O}_{40-8}$ 95
(M = Ti, Mn, Fe, Co, Ni or Pb) Related to $\gamma\text{-Bi}_2\text{O}_3$,
(with N. Rangavittal and T.N. Guru Row),
Eur. J. Solid State Inorg. Chem. **31**, 409 (1994).
10. Effect of Cation Size and Disorder on the Structure and 109
Properties of the Rare Earth Cobaltates, $\text{Ln}_{0.5}\text{A}_{0.5}\text{CoO}_3$,
(with P.V. Vanitha, A. Arulraj and P.N. Santosh),
Chem. Mater. **12**, 1666 (2000).
11. Orbital Ordering as the Determinant for Ferromagnetism in 114
Biferroic BiMnO_3 , (with A.M. dos Santos, A.K. Cheetham,
T. Atou, Y. Syona, Y. Yamaguchi, K. Ohoyama and H. Chiba),
Phys. Rev. **B66**, 64425 (2002).
12. Structure–Property Relationships in Superconducting 118
Cuprates, (with A.K. Ganguli),
Chem. Soc. Rev., 1 (1995).
13. Stripes and Superconductivity in Cuprates — Is there a 125
Connection? (with N. Kumar),
ChemPhysChem **4**, 439 (2003).
- III. Colossal Magnetoresistance, Charge Ordering and 131**
Related Aspects of Rare Earth Manganates
C.N.R. Rao
14. Colossal Magnetoresistance, Charge Ordering and Other 133
Novel Properties of Manganates and Related Materials,
(with A.K. Raychaudhuri),
in *Colossal Magnetoresistance, Charge Ordering and Related*
Properties of Manganese Oxides, Eds. C.N.R. Rao and B. Raveau,
World Scientific, Singapore, 1998, p. 1.
15. Charge, Spin and Orbital Ordering in the Perovskite 175
Manganates, $\text{Ln}_{1-x}\text{A}_x\text{MnO}_3$ (Ln = Rare Earth, A = Ca or Sr),
J. Phys. Chem. **B104**, 5877 (2000).
16. Electron–Hole Asymmetry in the Rare-Earth Manganates: A 188
Comparative Study of the Hole- and Electron-Doped Materials,
(with K. Vijaya Sarathy, P.V. Vanitha, R. Seshadri
and A.K. Cheetham),
Chem. Mater. **13**, 787 (2001).

17. Electric-Field-Induced Melting of the Randomly Pinned Charged-Ordered States of Rare-Earth Manganates and Associated Effects, (with A.R. Raju, V. Ponnambalam, S. Parashar and N. Kumar),
Phys. Rev. B **61**, 594 (2000). 197
18. Occurrence of Re-entrant Ferromagnetic Transitions in Rare-Earth Manganates on Cooling the Charge-Ordered States, (with A.K. Kundu and P.V. Vanitha),
Solid State Commun. **125**, 41 (2003). 202
19. Electronic Phase Separation in the Rare-Earth Manganates $(\text{La}_{1-x}\text{Ln}_x)_{0.7}\text{Ca}_{0.3}\text{MnO}_3$ (Ln = Nd, Gd and Y), (with L. Sudheendra),
J. Phys. Condens. Matter **15**, 3029 (2003). 206
- IV. Nanoparticles** 219
C.N.R. Rao
20. Growth of Nanometric Gold Particles in Solution Phase (with R. Seshadri, G.N. Subbanna, V. Vijayakrishnan, G.U. Kulkarni and G. Ananthakrishna),
J. Phys. Chem. **99**, 5639 (1995). 221
21. Size-Dependent Chemistry: Properties of Nanocrystals, (with G.U. Kulkarni, P.J. Thomas and P.P. Edwards),
Chem. Euro. J. **8**, 29 (2002). 227
22. Superlattices of Metal and Metal-Semiconductor Quantum Dots Obtained by Layer-by-Layer Deposition of Nanoparticle Arrays, (with K. Vijaya Sarathy, P.J. Thomas and G.U. Kulkarni),
J. Phys. Chem. B **103**, 399 (1999). 234
23. X-ray Photoelectron Spectroscopic Investigations of Cu-Ni, Au-Ag, Ni-Pd and Cu-Pd Bimetallic Clusters, (with K.R. Harikumar and S. Ghosh),
J. Phys. Chem. A **101**, 536 (1997). 237
24. Magic Nuclearity Giant Clusters of Metal Nanocrystals Formed by Mesoscale Self-Assembly, (with P.J. Thomas and G.U. Kulkarni),
J. Phys. Chem. B **105**, 2515 (2001). 242
25. Novel Effects of Metal Ion Chelation on the Properties of Lipoic Acid-Capped Ag and Au Nanoparticles, (with S. Berchmans and P.J. Thomas),
J. Phys. Chem. B **106**, 4647 (2002). 245

V. Nanotubes and Nanowires	251
C.N.R. Rao	
26. Carbon Nanotubes from Organometallic Precursors, (with A. Govindaraj), <i>Acc. Chem. Res.</i> 35 , 998 (2002).	253
27. Production of Bundles of Aligned Carbon and Carbon-Nitrogen Nanotubes by the Pyrolysis of Precursors on Silica-Supported Iron and Cobalt Catalysts, (with M. Nath, B.C. Satishkumar, A. Govindaraj and C.P. Vinod), <i>Chem. Phys. Lett.</i> 322 , 333 (2000).	263
28. B-C-N, C-N and B-N Nanotubes Produced by the Pyrolysis of Precursor Molecules over Co Catalysts, (with R. Sen, B.C. Satishkumar, A. Govindaraj, K.R. Harikumar, G. Raina, J.-P. Zhang and A.K. Cheetham), <i>Chem. Phys. Lett.</i> 287 , 671 (1998).	271
29. Boron-Carbon Nanotubes from the Pyrolysis of C_2H_2 - B_2H_6 Mixtures, (with B.C. Satishkumar, A. Govindaraj, K.R. Harikumar, J.-P. Zhang and A. K. Cheetham), <i>Chem. Phys. Lett.</i> 300 , 473 (1999).	277
30. Novel Experiments with Carbon Nanotubes: Opening, Filling, Closing and Functionalizing Nanotubes, (with B.C. Satishkumar, A. Govindaraj, J. Mofokeng and G.N. Subbanna), <i>J. Phys.</i> B29 , 4925 (1996).	282
31. The Decoration of Carbon Nanotubes by Metal Nanoparticles, (with B.C. Satishkumar, E.M. Vogl and A. Govindaraj), <i>J. Phys.</i> D29 , 3173 (1996).	292
32. A Study of Micropores in Single-Walled Carbon Nanotubes by the Adsorption of Gases and Vapors, (with M. Eswaramoorthy and R. Sen), <i>Chem. Phys. Lett.</i> 304 , 207 (1999).	296
33. Pressure-Induced Phase Transformation and the Structural Resilience of Single-Walled Carbon Nanotube Bundles, (with S.M. Sharma, S. Karmakar, S.K. Sikka, P.V. Teredesai, A.K. Sood and A. Govindaraj), <i>Phys. Rev.</i> B63 , 205417 (2001).	300
34. Hydrogen Storage in Carbon Nanotubes and Related Materials, (with G. Gundiah, A. Govindaraj, N. Rajalakshmi and K.S. Dhathathreyan), <i>J. Mater. Chem.</i> 13 , 209 (2003).	305

35. Inorganic Nanotubes, (with M. Nath), *Dalton Trans.*, 1 (2003). 310
36. Metal Nanowires and Intercalated Metal Layers in Single-Walled Carbon Nanotube Bundles, (with A. Govindaraj, B.C. Satishkumar and M. Nath), *Chem. Mater.* **12**, 202 (2000). 334
37. Synthesis of Metal Oxide Nanorods Using Carbon Nanotubes as Templates, (with B.C. Satishkumar, A. Govindaraj and M. Nath), *J. Mater. Chem.* **10**, 2115 (2000). 338
38. Nanowires, Nanobelts and Related Structures of Ga₂O₃, (with G. Gundiah and A. Govindaraj), *Chem. Phys. Lett.* **351**, 189 (2002). 343
39. Synthesis and Characterization of Silicon Carbide, Silicon Oxynitride and Silicon Nitride Nanowires, (with G. Gundiah, G.V. Madhav, A. Govindaraj and Md. M. Seikh), *J. Mater. Chem.* **12**, 1606 (2002). 349
40. Photoluminescence Spectra and Ferromagnetic Properties of GaMnN Nanowires, (with F.L. Deepak, P.V. Vanitha and A. Govindaraj), *Chem. Phys. Lett.* **374**, 314 (2003). 355
- VI. Molecular Solids** 361
C.N.R. Rao
41. Investigations of Diamond-Graphite Hybrids and Fullerenes with Seven-Membered Rings, (with R. Sen, R. Sumathy and B.C. Satishkumar), *J. Mol. Struct.* **436-437**, 11 (1997). 363
42. Polymerization and Pressure-Induced Amorphization of C₆₀ and C₇₀, (with A. Govindaraj, H.N. Aiyer and R. Seshadri), *J. Phys. Chem.* **99**, 16814 (1995). 371
43. A Combined Experimental and Theoretical Study of the Charge-Transfer Compound between C₆₀Br₈ and Tetrathiafulvalene, (with A. Govindaraj, R. Sumathy and A.K. Sood), *Mol. Phys.* **89**, 267 (1996). 374

44. Hydrothermal Synthesis of Organic Channel Structures: 385
 1:1 Hydrogen-Bonded Adducts of Melamine with Cyanuric
 and Trithiocyanuric Acids, (with A. Ranganathan and
 V.R. Pedireddi),
J. Am. Chem. Soc. **121**, 1752 (1999).
45. An Organic Channel Structure Formed by the 387
 Supramolecular Assembly of Trithiocyanuric Acid
 and 4,4'-bipyridyl, (with A. Ranganathan, V.R. Pedireddi
 and S. Chatterjee),
J. Mater. Chem. **9**, 2407 (1999).
46. Self-Assembled Four-Membered Networks of Trimesic Acid 392
 Forming Channel Structures, (with S. Chatterjee,
 V.R. Pedireddi and A. Ranganathan),
J. Mol. Struct. **520**, 107 (2000).
47. A Novel Hybrid Layer Compound Containing Silver 401
 Sheets and An Organic Spacer, (with A. Ranganathan,
 V.R. Pedireddi and A.R. Raju),
Chem. Commun., 39 (2000).
48. Experimental and Theoretical Electronic Charge Densities in 403
 Molecular Crystals, (with G.U. Kulkarni and R.S. Gopalan),
J. Mol. Struct. (Theochem) **500**, 339 (2000).
49. An Experimental Charge Density Study of the Effect of the 427
 Noncentric Crystal Field on the Molecular Properties of
 Organic NLO Materials, (with R.S. Gopalan and G.U. Kulkarni),
ChemPhysChem **1**, 127 (2000).
- VII. Porous Solids 437**
C.N.R. Rao
50. Evidence for Supramolecular Organization of Alkane and 439
 Surfactant Molecules in the Process of Forming
 Mesoporous Silica, (with N. Ulagappan),
Chem. Commun., 2759 (1996).
51. Phase Transformations in Mesoporous Zirconia, 441
 (with Neeraj),
J. Mater. Chem. **8**, 1631 (1998).
52. Mesoporous Phases Based on SnO₂ and TiO₂, 445
 (with N. Ulagappan),
Chem. Commun., 1685 (1996).

53. Mesoporous Aluminoborates, (with S. Ayyappan), <i>Chem. Commun.</i> , 575 (1997).	447
54. High Catalytic Efficiency of Transition Metal Complexes Encapsulated in a Cubic Mesoporous Phase, (with M. Eswaramoorthy and Neeraj), <i>Chem. Commun.</i> , 615 (1998).	449
55. Metal Chalcogenide–Organic Nanostructured Composites from Self-Assembled Organic Amine Templates, (with Neeraj), <i>J. Mater. Chem.</i> 8 , 279 (1998).	451
56. Synthesis of Hexagonal Microporous Silica and Aluminophosphate by Supramolecular Templating of a Short-Chain Amine, (with M. Eswaramoorthy and S. Neeraj), <i>Micro. Meso. Mater.</i> 28 , 205 (1999).	453
57. Macroporous Oxide Materials with Three-Dimensionally Interconnected Pores, (with G. Gundiah), <i>Solid State Sci.</i> 2 , 877 (2000).	459
58. Macroporous Carbons Prepared by Templating Silica Spheres, (with G. Gundiah and A. Govindaraj), <i>Mater. Res. Bull.</i> 36 , 1751 (2001).	465
VIII. Open Framework Materials C.N.R. Rao	473
59. Aufbau Principle of Complex Open-Framework Structures of Metal Phosphates with Different Dimensionalities, (with S. Natarajan, A. Choudhury, S. Neeraj and A.A. Ayi), <i>Acc. Chem. Res.</i> 34 , 80 (2001).	475
60. Understanding the Building-Up Process of Three Dimensional Open-Framework Metal Phosphates: Acid Degradation of the 3D Structures to Lower Dimensional Structures, (with A. Choudhury), <i>Chem. Commun.</i> , 366 (2003).	483
61. A New Route for the Synthesis of Open-Framework Metal Phosphates Using Organophosphates, (with S. Neeraj, P.M. Forster and A.K. Cheetham), <i>Chem. Commun.</i> , 2716 (2001).	485
62. An Open-Framework Iron Phosphate with Large Voids Exhibiting Spin-Crossover, (with A. Choudhary and S. Natarajan), <i>Chem. Commun.</i> , 1305 (1999).	487

63. An Unusual Open-Framework Cobalt(II) Phosphate with a Channel Structure that Exhibits Structural and Magnetic Transitions, (with A. Choudhury, S. Neeraj and S. Natarajan), <i>Angew. Chem. Int. Ed.</i> 39 , 3091 (2000).	489
64. Organically Templated Mixed-Valent Iron Sulfates Possessing Kagomé and Other Types of Layered Networks, (with G. Paul, A. Choudhury and E.V. Sampathkumaran), <i>Angew. Chem. Int. Ed.</i> 41 , 4297 (2002).	492
65. Three-Dimensional Organically Templated Open-Framework Transition Metal Selenites, (with A. Choudhury and U. Kumar), <i>Angew. Chem. Int. Ed.</i> 41 , 158 (2002).	496
66. Synthesis of a Hierarchy of Zinc Oxalate Structures from Amine Oxalates, (with R. Vaidhyanathan and S. Natarajan), <i>J. Chem. Soc., Dalton Trans.</i> , 699 (2001).	500
67. Aliphatic Dicarboxylates with Three-Dimensional Metal-Organic Frameworks Possessing Hydrophobic Channels, (with R. Vaidhyanathan and S. Natarajan), <i>Dalton Trans.</i> , 1459 (2003).	508
68. Hybrid Open-Framework Iron Phosphate-Oxalates Demonstrating a Dual Role of the Oxalate Unit, (with A. Choudhury and S. Natarajan), <i>Chem. Euro. J.</i> 6 , 1168 (2000).	514
69. Hybrid Inorganic-Organic Host-Guest Compounds: Open-Framework Cadmium Oxalates Incorporating Novel Extended Structures of Alkali Halides, (with R. Vaidhyanathan and S. Natarajan), <i>Chem. Mater.</i> 13 , 3524 (2001).	522
70. Sodalite Networks Formed by Metal Squarates, (with S. Neeraj, M.L. Noy and A.K. Cheetham), <i>Solid State Sci.</i> 4 , 1231 (2002).	532
