ACKNOWLEDGMENTS

We owe a debt of gratitude to a number of people and institutions for assistance in the preparation of this book. The concept for this volume evolved from the occasion of the 46th University of Otago Foreign Policy School. As Co-Directors of that School and editors of this book, we wish to acknowledge the substantial support that made this volume possible.

First, we would like to thank our colleagues on the Academic Committee of the 46th School: Ms Jan Brosnahan, the School Coordinator, Associate Professor Jenny Bryant-Tokalau, Associate Professor Paul Hansen, Mr Pierce Lane, Associate Professor Jacqueline Leckie, Mr Eliot Lynch, Mrs Betty Mason-Parker, Professor Philip Nel, Dr Maria Pozza, Dr Chris Rosin, and Dr Paola Voci.

Second, the research assistance of Ms Sarah Macindoe, a Master of International Studies (MIntSt) graduate at the University of Otago, in the preparation of this volume deserves a special mention. Sarah did an outstanding job in supporting the editors; helping to facilitate coordination and communication with the contributors to the book; writing a chapter of her own; and contributing to the multi-authored chapter, which sets the scene for this volume.

Third, we would like to thank all the contributors to this book. They constitute a distinguished international team of specialists. They cheerfully accepted our editorial guidelines and took the time to revise their initial drafts into polished and stimulating chapters.

Fourth, we wish to express our sincere thanks for the encouraging and patient support for the project given by the staff at World Scientific Publishing. That assistance was greatly appreciated by the editors.

Fifth, we wish to thank all those organisations whose support and sponsorship played a significant role in bringing together our team of contributors. Without this support, it would have been difficult to develop the idea of this book. We are grateful to: the Australian High Commission, Wellington; the New Zealand Ministry of Foreign Affairs and Trade, Wellington; the

New Zealand Ministry of Foreign Affairs and Trade's Seriously Asia Programme; the New Zealand Ministry of Research, Science and Technology, Wellington; Orbit Corporate Travel, Dunedin; and the University of Otago.

Finally, and most importantly, we should especially like to thank our families, particularly our partners, Wiebke and Martha. Throughout the duration of this book, they were supportive in every possible way.

Lloyd S. Davis and Robert G. Patman
University of Otago,
New Zealand.
28 April 2014

ABOUT THE EDITORS

Lloyd S. Davis is an internationally recognized scientist, as well as an award-winning author and filmmaker. Currently the inaugural Stuart Professor of Science Communication at the University of Otago, he has authored over 130 refereed scientific publications. He is regarded as a world authority on penguins and academic honours bestowed upon him have included a Fulbright Fellowship, an Anzac Fellowship and a Prince and Princess of Wales Science Award.

He is the author of seven books and has edited two more. These include *The Plight of the Penguin*, winner of the New Zealand Children's Book of the Year Award and *Looking for Darwin*, winner of the CLL Writers Award for Nonfiction. His eighth book, *Professor Penguin*, is due to be published in late 2014.

Robert G. Patman's research interests concern US foreign policy, international relations, global security, great powers and the Horn of Africa. He is an editor for the journal *International Studies Perspectives*, and the author or editor of 11 books. Recent publications include a volume called *Strategic Shortfall: The 'Somalia Syndrome'* and the *March to 9/11* (Praeger, 2010) and two co-edited books titled *The Bush Leadership*, *the Power of Ideas*, and *the War on Terror*

(Ashgate, 2012), and *China and the International System: Becoming a World Power* (Routledge, 2013). He is a Fulbright Senior Scholar, a Senior Fellow at the Centre of Strategic Studies, Wellington, an Honorary Professor of the NZ Defence Command and Staff College, Trentham, and provides regular contributions to the national and international media on global issues and events.

ABOUT THE CONTRIBUTORS

Edison Liu was in Hong Kong in 1952. Edison obtained his B.S. in chemistry and psychology, as well as his M.D., at Stanford University. He served his internship and residency at Washington University's Barnes Hospital in St. Louis, followed by an oncology fellowship at Stanford. From 1982 to 1987 he was at the University of California, San Francisco, first in a haematology fellowship at Moffitt Hospital and then as a postdoctoral fellow in the laboratory of Nobel

Laureate J. Michael Bishop, while also serving as an instructor in the School of Medicine.

From 1987 to 1996 he was an assistant professor at the University of North Carolina at Chapel Hill in medicine and oncology at the School of Medicine, and rose to full professor directing the UNC Lineberger Comprehensive Cancer Centre's Specialized Program of Research Excellence in Breast Cancer. He was also the director of the Laboratory of Molecular Epidemiology at UNC's School of Public Health, chief of medical genetics, and chair of the Correlative Science Committee of the national cooperative clinical trials group, CALGB. In 1997, he was appointed the Scientific Director of the Division of Clinical Sciences at the National Cancer Institute (USA) overseeing the intramural clinical sciences program for the institute. Between 2001–2011, Dr. Liu was the founding Executive Director for the Genome Institute of Singapore. He joined the Jackson Laboratory in 2012 as its President and CEO, and as the Director of the Jackson Laboratory NCI Designated Cancer Centre.

Vaughan Turekian is the Chief International Officer for the American Association for the Advancement of Science (AAAS) and the Founding Director of AAAS's Center for Science Diplomacy. In 2011, Vaughan became the founding Editor-in-Chief of *Science and Diplomacy Quarterly*. Vaughan was formerly an AAAS Diplomacy Fellow at the US Department of State in the Climate Office, before serving as the Special Adviser to the Under Secretary of State for Global

Affairs. He is the two-time recipient of the Department's Superior Honour Award for his work on climate change and avian influenza. Prior to his time at the State Department, he worked at the National Academy of Sciences (NAS). In 2001, he was the Study Director for the NAS report on climate change science requested by the White House. He is currently an adjunct professor in Georgetown's School of Foreign Service and a Distinguished Visiting Scholar at University College London. Vaughan received his masters and doctorate in atmospheric geochemistry from the University of Virginia. He is a graduate of Yale University with degrees in geology and geophysics, and international studies.

Sefton Darby is the National Manager for Minerals at the Ministry of Business, Innovation and Employment (MBIE) in New Zealand. Prior to taking up his current role he worked for the Newmont Mining Corporation, the World Bank, the UK Government (Cabinet Office and the Department for International Development) and ran his own international development consultancy with various government, multilateral and NGO clients. During

this time he worked on resource governance issues in a number of countries in West Africa, the former Soviet states, and the Asia-Pacific. He is a graduate of the universities of Otago and St Andrews. His contributed work in this book is entirely based on his previous experience in international aid and development and reflects his personal views only — in no way does it reflect the views of MBIE.

Gary Wilson is Director of the New Zealand Antarctic Research Institute and Professor of Marine Science at the University of Otago and also holds an adjunct position in the Geology Department at Otago. Gary has participated in and led more than 20 expeditions to the Antarctic and Subantarctic supported by the New Zealand and US Antarctic Programmes. He has contributed to more than 80 scientific papers in peer research journals. He has held the Byrd Fellowship at the Ohio State University, the Blaustein Visiting Professorship at Stanford University and in 2006 he received a Sir Peter Blake Leadership award for his role in bringing together the multinational team for the ANDRILL project, which he chaired between 2004 and 2009.

A University of Auckland Distinguished Professor, **Peter Gluckman** is Professor of Paediatric and Perinatal Biology. He was formerly Chairman of the Department of Paediatrics and Dean of the Faculty of Medical and Health Sciences for nine years. He has been extensively involved in many aspects of science, health and educational policy development. He is currently Chief Science Advisor to the Prime Minister of New Zealand, a post he held since July 2009. In

2009, he became a Knight of the New Zealand Order of Merit replacing the 2008 Distinguished Companion of the New Zealand Order of Merit, for services to medicine and having previously been made a Companion of the Order in 1997. In 2001, he received New Zealand's top science award, the Rutherford Medal. Sir Peter is an international advocate for science, promoting the translation of discoveries in biomedical research into improvements in long term health outcomes. His work with organisations such as the WHO has brought growing recognition of the importance of a healthy start to life. He is the author of over 600 scientific papers and reviews and editor of eight books, including three influential textbooks in his subject area.

Joan Leach (BA Hons, BSc, MA, PhD) convenes the Science Communication Program at the University of Queensland and is Associate Professor of Rhetoric in the School of English, Media Studies and Art History. Her research is centred on public engagement with science, medicine and technology and she has been active in the Australian government's recent initiatives toward "Inspiring Australia". She is currently researching the role of popular science in the globalisation of science since the 1960s, a project funded by the Australian Research Council. She has published extensively about science communication, including a 2012 book *Rhetorical Questions of Health and Medicine*, and was editor of the *International Journal, Social Epistemology* from 1997 to 2010 and is now an executive editor for the journal. She held academic posts at the University of Pittsburgh (USA) and Imperial College London before moving to Brisbane in 2005. While remaining transfixed by science, she advocates for better science communication which critically examines the social impact of science, technology and biomedicine.

Stephen Goldson's scientific career has been as an entomologist working on New Zealand's very damaging exotic pasture pest species (especially weevils). Through this work he was able to make a useful contribution to the suppression of these pests based on imported parasitoid wasp biological control agents. He is now a principal scientist in AgResearch Ltd., New Zealand and Theme Leader in the Bio-Protection Research Centre at Lincoln University. In

the mid-1990s, Stephen worked part-time as Science Adviser to the then Minister of Research, Science and Technology. A similar arrangement has been underway since 2009 whereby he has a part-time appointment as strategist to the Chief Science Advisor to the New Zealand Prime Minister, Professor Sir Peter Gluckman. On the basis of his research contribution he was elected as a Fellow of the New Zealand Institute of Agricultural and Horticultural Science (1998) and the Royal Society of New Zealand (2006).

In 2014 he was appointed as an Officer of the New Zealand Order of Merit for his service to science in New Zealand.

Jeffrey H. Boutwell is former Executive Director of the Pugwash Conferences on Science and World Affairs, an international scientific organisation founded in 1957 to seek ways of eliminating nuclear weapons and other weapons of mass destruction, which in 1995 received the Nobel Peace Prize. He is the author of *The German Nuclear Dilemma* (Cornell University Press, 1990) and has written widely on nuclear weapons issues, small arms and light weapons, environmental degradation and conflict, and Israeli-Palestinian security issues. He received his PhD from the Massachusetts Institute of Technology and his MSc from the London School of Economics. Previously, he was a staff aide on the National Security Council during the Carter administration, Associate Executive Officer at the American Academy of Arts and Sciences in Boston, and an editor and reporter at the City News Bureau of Chicago.

Manjana Milkoreit is a Postdoctoral Research Fellow with the Walton Sustainability Solutions Initiatives at ASU's Julie Ann Wrigley Global Institute of Sustainability and an affiliate of the Consortium for Science, Policy and Outcomes. Her research concerns the role of cognition and emotion in climate change politics and sustainability decision making. She is particularly interested in the use of scientific knowledge in political, policy and governance processes, the role of ideologies in

advancing or preventing effective societal responses to climate change, and the cognitive ability to imagine distant futures. Manjana's previous work analysed whether and how cognitive processes influence the search for cooperative multi-lateral solutions in the UNFCCC. She has also studied the changing role of the emerging powers (China, India, Brazil, and South Africa) in the global climate negotiations. She is an active member of international, multidisciplinary research networks on complexity, resilience and social-ecological systems, including the Resilience Alliance and the Waterloo Institute for Complexity and Innovation.

Manjana holds a Master in Public Policy from the Harvard Kennedy School and a PhD in Global Governance from the University of Waterloo.

Daryl Copeland is an educator, analyst, consultant and author of *Guerrilla Diplomacy: Rethinking International Relations* (Lynne Rienner Publishers, 2009), and has written over 100 articles and book chapters for the scholarly and popular media. A former Canadian diplomat who served in Thailand, Ethiopia, New Zealand, and Malaysia, he is now Senior Fellow at the Canadian Defence and Foreign Affairs Institute, and specialises in the relationship between science,

technology, diplomacy and international policy. He holds teaching appointments at the Diplomatic Academy of Vienna, as well as Ottawa, Otago (NZ), and East Anglia Universities. Daryl is a peer reviewer for the University of Toronto Press, *Canadian Foreign Policy*, *the International Journal*, and *The Hague Journal of Diplomacy*, and is a member of the Editorial Board of the journal *Place Branding and Public Diplomacy* and for the Advisory Board of Canadian Foreign Policy. In 2009, he was Research Fellow at the Centre on Public Diplomacy, University of Southern California and from 2009 to 2011 he served as Adjunct Professor at the Munk School of Global Affairs. In 2000, he received the Canadian Foreign Service Officer Award; and in 2012, he received the Molot Prize for foreign policy analysis. For more information and commentary, see www.guerrilladiplomacy.com, and follow him on Twitter @GuerrillaDiplo.

Sarah Macindoe holds a BA (Hons) in Politics and a BSc in Genetics from the University of Otago in New Zealand, and in February 2014 was awarded a Master of International Studies (Distinction) by the same institution. Sarah's studies prompted an interest in issues surrounding resource scarcity — particularly in the area of food security — and in international efforts to combat and manage such threats. Sarah now works as an analyst in the National

Assessments Bureau, a unit of the Department of Prime Minister and Cabinet

in Wellington, New Zealand. The views expressed in Sarah's chapter are her own and do not necessarily reflect the views of the New Zealand government.

Cathleen A. Campbell joined CRDF Global in 2002 and was appointed President and CEO in 2006. Cathleen brings three decades of international science, technology and innovation policy and programme management experience. She has worked with countries in Eurasia, the Middle East, Asia and Latin America. Cathleen served from 1998 to 2002 as director of the Office of International Technology Policy and Programs, Department of Commerce. From 1995 to 1997, she was a senior policy analyst in the White House Office of Science and Technology Policy. Cathleen was the US State Department's program officer for Soviet/Russian science and technology affairs from 1989 to 1994. Previously she held research positions in the private sector. Cathleen serves on the External Advisory Board, Pennsylvania State University's School of International Affairs; the US-Russia Innovation Working Group; the Advisory Board, Muslim-Science.com; and the Innovation Index Advisory Committee, US-Israel Science and Technology Foundation.

CRDF Global is an independent non-profit organization that promotes international science and technology cooperation through grants, technical resources, training and services. With a staff of 150 located in five countries, CRDF Global implements high-impact programs and services in over forty countries.

Atsushi Sunami is Professor at the National Graduate Institute for Policy Studies and a former special adviser to the Minister of State for Science and Technology Policy, the Cabinet Office of Japan.

Tomoko Hamachi is professional staff for the National Graduate Institute for Policy Studies Innovation, Science and Technology Policy Program, Japan.

Shigeru Kitaba is fellow and manager at the Department of Strategy, Centre for Research and Development Strategy, Japan Science and Technology Agency.
