The following points require correction:

1. Reference [43] has the wrong page number. The correct citation is: [43] J. W. Kantelhardt, S. A. Zschiegner, E. Koscielny-Bunde, S. Havlin, A. Bunde and H. E. Stanley, *Physica A* **316**, 87 (2002).
2. The MF-DFA method has been originally introduced in [43] and we only used it in our work. To make more sense, Ref. [43] must be cited on page 859, section 2 of the paper as a proper place. So the first sentence of the second paragraph should change to: “The modified multifractal DFA (MF-DFA) procedure consists of five steps [43].”
3. In section 2 of our paper, we inadvertently used the same text that the authors of Ref. [43] used before to introduce the method and to present the steps of the MF-DFA method. Indeed, this part is a repeat of the results of Ref. [43] and we only used this method in analyzing the painting color series.
