ERRATUM

DO THE PRESENT ELECTROWEAK PRECISION MEASUREMENTS LEAVE ROOM FOR EXTRA GENERATIONS?

[Mod. Phys. Lett. A, Vol. 10, No. 26 (1995) 1915–1922]

In this letter, some relevant references were omitted:

For some of the earlier, essentially preLEP, discussions of the fourth generation contribution to the electroweak radiative corrections see Refs. 8–12. Note, in particular, that in Refs. 8 and 9 the correction Δr was discussed (which in our notations corresponds to V_m). Reference 12 deals with mixing between the light fermions with those of the fourth generation, which is responsible for their decays. In our discussion we neglect small corrections induced by this mixing.
