IS LEPTON-QUARK MASS PRESET BY A CHARGE-NUMBER RELATION?

[Mod. Phys. Lett. A, Vol. 11, No. 20 (1996) 1687–1689]
Gerald Rosen

On p. 1688, the numerical prefactor that precedes the quantity $(|Q| - Q^2)$ below Eq. (3) was inverted in typesetting; the associated equation should read

$|B| = \frac{3}{2}(|Q| - Q^2)$, which yields $|B| = 0$ for $|Q| = 0, 1$ and $|B| = \frac{1}{3}$ for $|Q| = \frac{1}{3}, \frac{2}{3}$.
