The last of expressions (3.10) should read:

$$T\sqrt{-g} g^{ab} = \frac{V_a V_b}{2V_0} - \frac{2T}{P} \text{cof}(\partial_a X \cdot \partial_b X) \left[TV_0 + \frac{\sqrt{-g}(p-1)}{\det(\partial_a X \cdot \partial_b X)} \right]$$
