ERRATA

MAP COLORING, q -DEFORMED SPIN NETWORKS, AND TURAEV-VIRO INVARIANTS FOR 3-MANIFOLDS

LOUIS H. KAUFFMAN

[*Int. J. Mod. Phys. B* 6, 1765–1794 (1992)]

1. Page 1777, 4th line after Section 4 should read:

$$1. \langle \infty \rangle = A \langle \asymp \rangle + A^{-1} \langle \rangle \langle \rangle$$

2. Page 1778, the formula after line 1 should read:

$$\tilde{\varepsilon} = \begin{bmatrix} 0 & A \\ -A^{-1} & 0 \end{bmatrix}.$$

3. Page 1785, in the last paragraph before Section 6, the formulae should read:

$$\begin{aligned} \begin{array}{c} \cup \\ \cap \end{array} &= - \begin{array}{c}) \\ (\end{array} \quad \begin{array}{c} - \\ X \end{array} \\ 0 &= -2, \quad \begin{array}{c} a \\ \diagup \quad \diagdown \\ c \end{array} \quad \begin{array}{c} b \\ \diagdown \quad \diagup \\ d \end{array} = +\delta_a^a \delta_c^b \end{aligned}$$
