Obituary

Igor Chueshov (September 23, 1951–April 23, 2016)
 Courtesy of Kharkov University

On April 23, 2016 our colleague Igor Chueshov unexpectedly passed away after a short illness. The Editorial Board of Stochastics and Dynamics is deeply concerned to losing a colleague of great mathematical experience and knowledge. Being a founding co-editor of the journal in 2000 he had enormous impact on the scientific development of the journal. He is well known for his research in the area of stochastic partial differential equations: nonregular and long-time behavior of infinite dimensional dissipative dynamical systems arising in Mechanics and Physics. He published more than 150 scientific articles, several textbooks and three research monographs (partly with I. Lasiecka): (i) *Monotone random systems-theory and applications*, (ii) *Long-time behaviour of second order evolution equations with nonlinear damping* and (iii) *Von Karman evolution equations. Well-posedness and long-time dynamics*.
